

Sussex County Public Schools

MEMORANDUM

TO: All Parents / Guardians

FROM: Arthur L. Jarrett, Jr., Division Superintendent

DATE: October 2014

SUBJECT: Powerschool Grade Portal

Sussex County Public Schools is providing parents an opportunity to view their K-12 children's attendance and grades record through our division's student information system, Powerschool. It allows parents/guardians to log into the system to view real-time information regarding their child (ren)'s attendance and grades. Other information will also be available from time to time such as detailed assignment descriptions, school bulletins, and teacher messages or comments regarding your child's progress. You are always connected and are able to participate fully in staying abreast of your child's progress. Whenever an assignment or quiz has been given and graded by the teacher, the parent will be able to view real-time progress rather than waiting for the interim report or the nine-week report card. Please always allow a reasonable time for teachers to post your child's grade in Powerschool.

You can request your account information from your child's school. Do not share your login information with anyone. Sharing that information allows other access to your child's information and the school division cannot be responsible for that information being shared. Please be mindful that your login is for your usage only and access to your child's information.
